

Work Project defense via Videoconference

*Guidelines for students conducting a remote Work Project defense using
Microsoft Teams platform.*

Overview

Process for a remote Work Project (WP) defense via videoconference:

1. Defense calendar. WP Team sends the details of the defense date, time and jury members.
2. Defense prearrangement. WP teams creates individual meeting links for each defense. Closer to your defense, you will receive an outlook invite with this link directly to your Nova SBE account.
3. Starting the defense. Follow the link in the invitation at the time appointed for the session (Lisbon time).

Students defending their WP must

- a. Turn on the camera and microphone. No defenses will take place without both image & audio.
 - b. Click on “Open Share Tray” to display the WP presentation.
 - c. Wait for the President of the Jury to formally open the defense session.
4. During the defense. The President of the Jury is the moderator of the session. He/she will conduct the defense in a timely matter and accept external attendees/guests (if applicable).
 5. Deliberations. President of the Jury will remove the student (and others) from the meeting and all him back after the deliberation.

6. End of defense. The President of the Jury asks the student to back into the defense session to communicate the WP grade, providing some feedback.

Guests and external attendees

Work project defenses are open to public according to Portuguese legislation. The School announces Masters' WP defenses in the official website.

If you wish your colleagues, family members or others to attend your defense, please share the link with them. All attendees must be familiar to videoconferencing etiquette, namely turning off their cameras and making sure their microphones are on mute.

Representatives of an organization involved in the WP may also be invited to attend the defenses, at the discretion of the advisor / student(s). They do not have the right to decide on the student's grade neither participate in the defense discussion nor private deliberation with the jury members.

Before your defense

- Defense duration, WP assessment criteria and other relevant information is available in the Work Project Guidelines which can be found [Here](#).
- Use a reliable computer with a working camera and microphone. Take the time to arrange your camera, sound and lighting in advance. When possible, use a headset - a good microphone is essential.
- Make sure your internet will allow you to have a seamless experience. Check your internet connection in the room you plan to use (use an internet speed test like <https://www.speedtest.net> and make sure you have at least 10Mbps of upload and download speed).
- Have everything you will need to share ready. Your presentation should be already open before the call starts.
- Defenses must start on time. Login to Microsoft Teams early.
- If needed, arrange a Microsoft Teams test session with the IT Helpdesk team in advance. Contacts below.

Best practices

- For better internet connection, move closer to your wireless router or ask other members of your house to avoid high-bandwidth activities (e.g. Netflix, other video calls, online games, etc.) may also help.
- Choose a calm place with low noise levels. Having background noise can be very distracting for participants.
- If you have notes besides your presentation, practice how you will set up and deliver that beforehand.
- Avoid nudging/jostling the table on which your computer sits.
- Try to stay in front of your computer throughout the defense.
- Mute microphone while not speaking to avoid background noise. Headphones are recommended, but not required.
